2. Search "Moodle Mobile"
3. Install

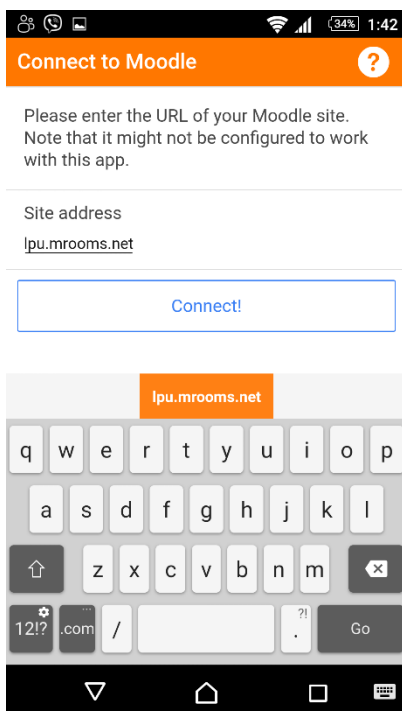

4. Accept

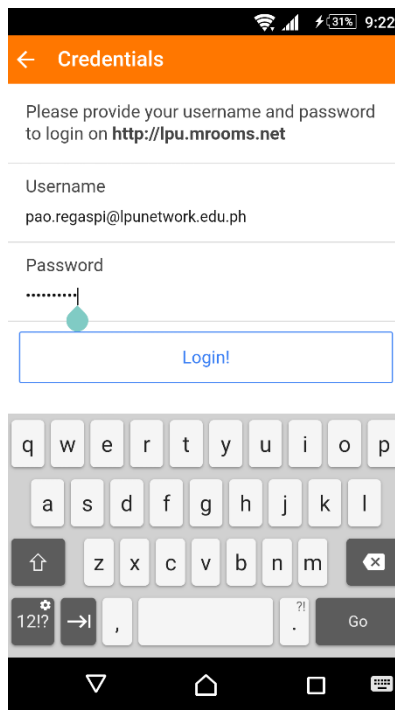

5. Open (Moodle Mobile application)

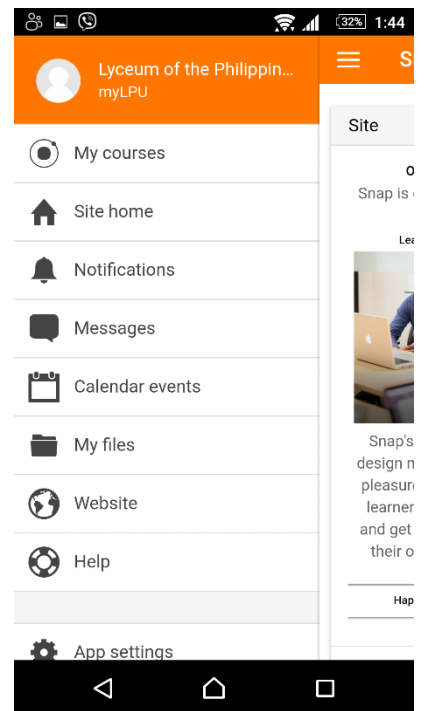

6. Input site address "lpu.mrooms.net"

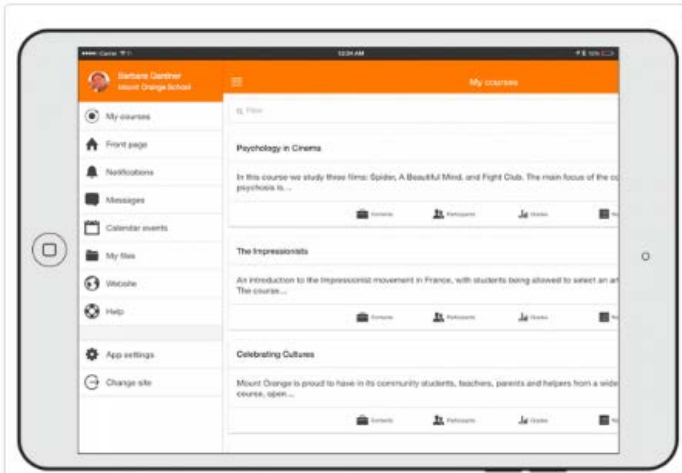

7. Input (Username and Password)

8. Successfully Login

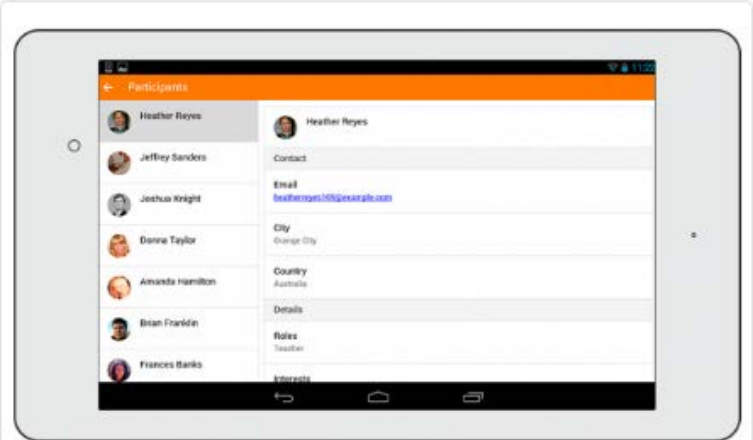

Moodle Mobile features

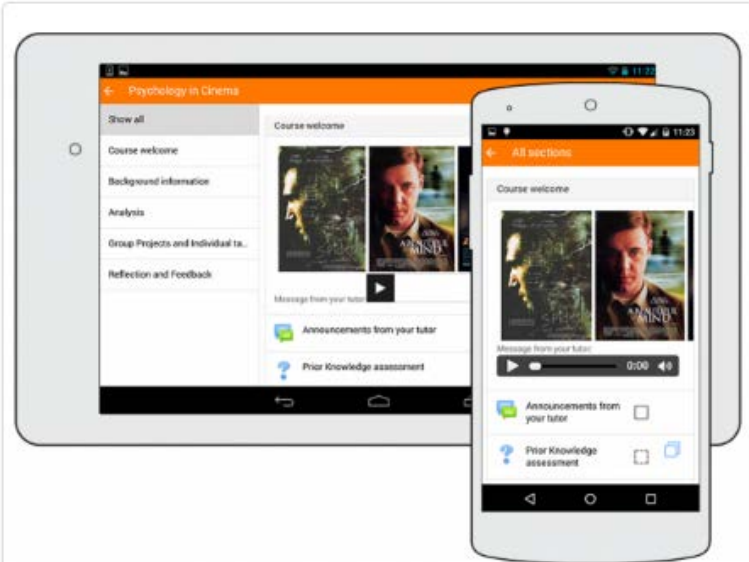

See your courses at glance

Your courses are listed with easy access to contents, participants, grades and notes. A useful filter field lets you find a particular course quickly. If your token expires during a session, you're prompted to re-enter your password and continue.

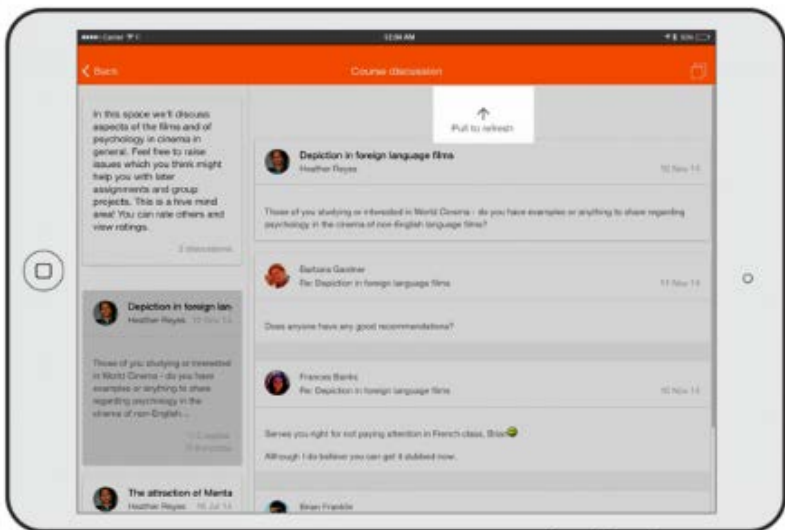

Connect with course participants

Infinite scrolling improves access to the participant view, with the complete user profile now displayed and available from every page.

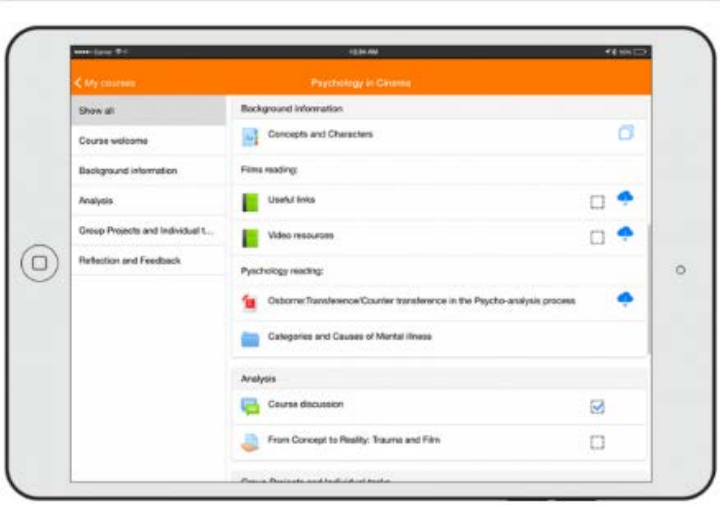

Orientation and resolution support

The app displays in portrait or landscape view, whatever your screen resolution.

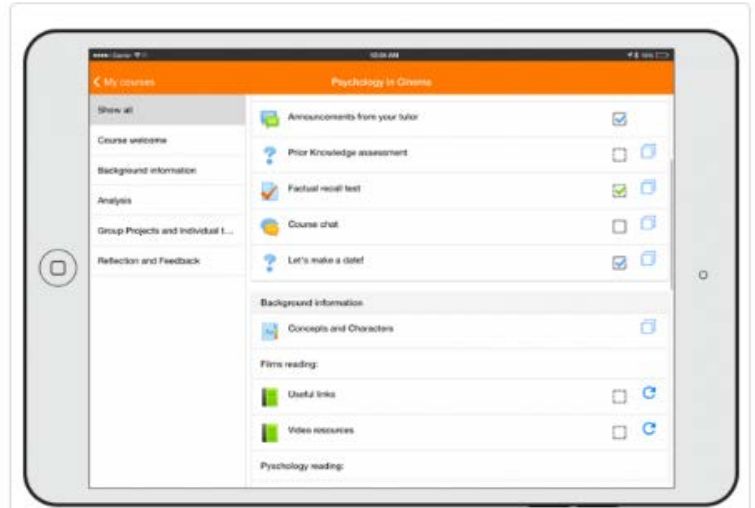

Pull to refresh

Most screens will allow you to pull to refresh, improving the real-time participation experience.

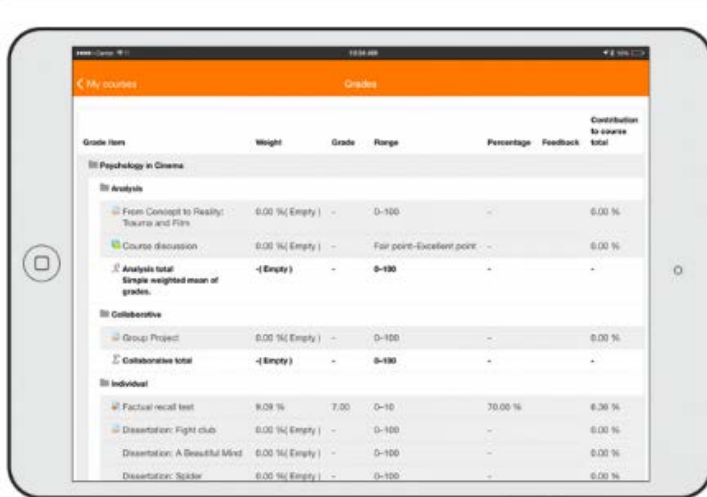

Easily access course content

View course activities and download materials for offline use. Work through Books and IMS Content packages directly in the app. The downloading status of resources is preserved even when changing sections or pages.

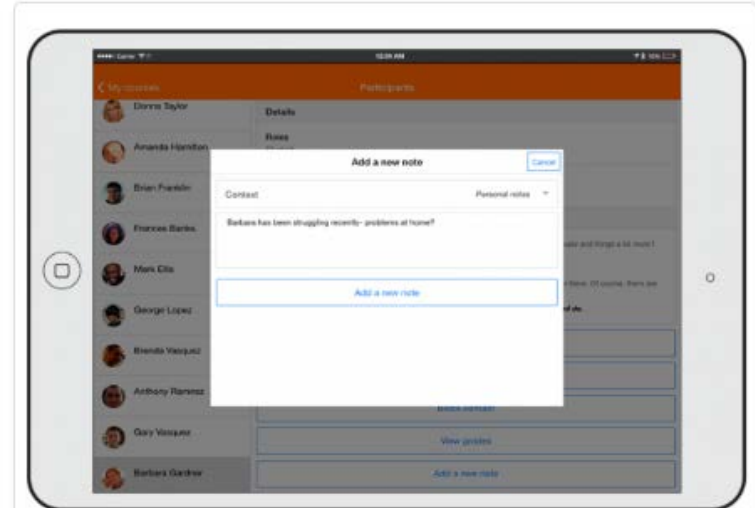

Activity completion

Track progress from your device with Activity completion. Automatic completion is registered, and students can also manually mark a task complete on their mobile.

Grades and grading

A Grades link for each course gives fingertip access to the gradebook, and teachers can view assignment submissions on the move.

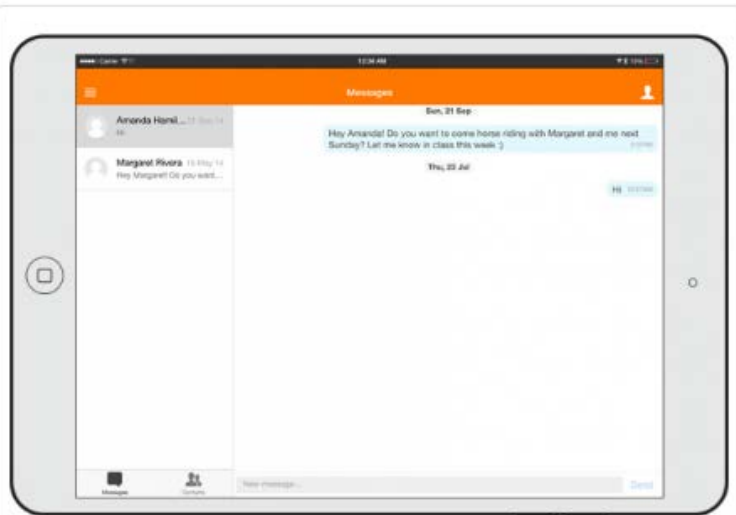

Notes

Teachers can view site, course and personal notes about their students and add their own notes.

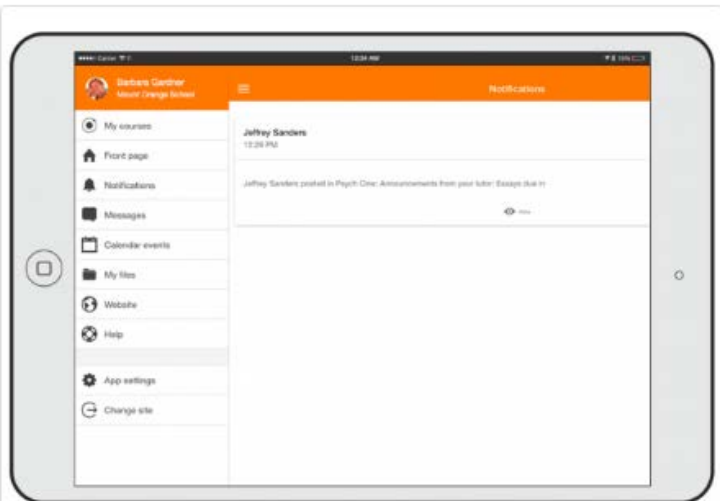

Keep up to date with calendar events

Site, course and user events can be viewed in the calendar. Calendar events can now be viewed offline and infinite scrolling is available.

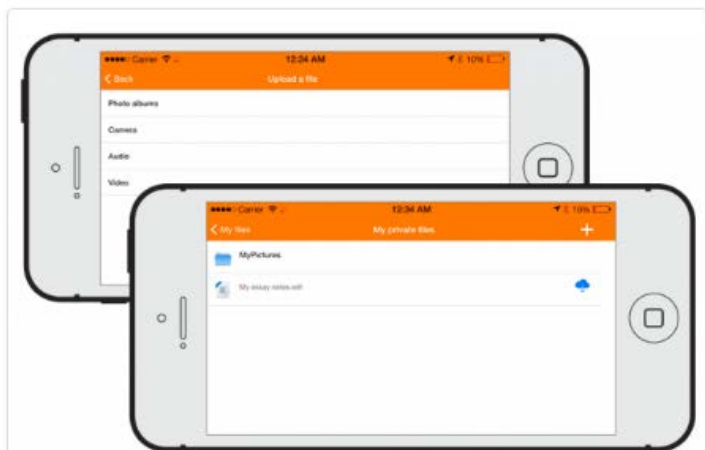

Message participants

Send and view private messages to colleagues and students from the Messages link in the side tab.

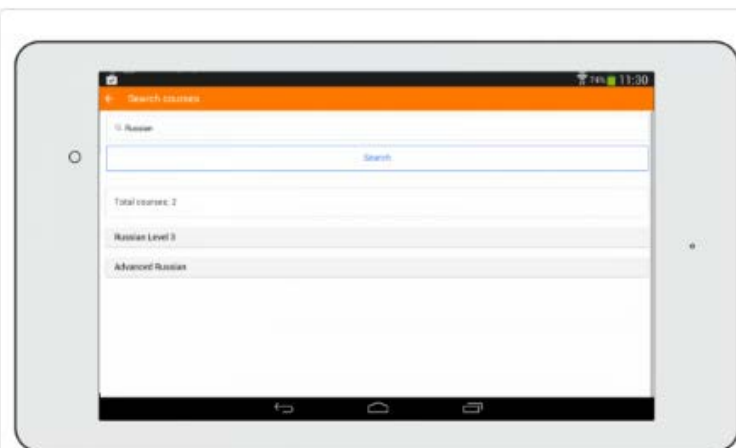

Notifications

Keep up to date with notifications. The app supports both local (calendar events) and push (messages, forum posts, submitted assignments etc) notifications. See [Mobile app notifications](#) for more details. Infinite scrolling is available and local notifications have multi-site support.

View and upload to your Private files

Check the contents of your private files and upload media to them on the go. You're now allowed up to 50MB storage (depending on your SD card).

Search the list of courses

App users can search courses to find one they wish to take.

Engage in chat, on the move

Participate in a course [Chat activity](#).
